

The ladies of the Memorial Society are progressing nicely with their subscription for the granitoid walk to the cemetery. They have over \$250 already subscribed and have a large number of patrons of the cemetery yet to see who will more than likely help. Everybody seemed enthused over the matter and we have yet to hear the first person speak discouraging of this fine improvement. We understand they expect to put down a good walk while they are at it and in this we agree with them. It is proposed to begin it at the corner by Mrs. Mary Kennedy's and run it to where the drives fork in the cemetery, a distance of about 600 feet and that the walk is to be four feet wide.
